Re: Water Quality Status of Beaver Valley Water Co., Public Water System (PWS) 04-004

Dear Mr. Olea:

As of the date of this letter, the water quality of Beaver Valley Water Co., PWS 04-004, meets ADEQ drinking water standards except for disinfection byproducts (DBP) and maximum residual disinfection levels (MRDL) sampling. The water system has failed to sample during the warmest time of the year, so ADEQ can not determine if the water system meets the DBP and MRDL parameters.

If you need any additional information or help, please feel free to contact me at (800) 234-5677 ext. 771-4841.

Sincerely,

Romann G. Diaz, Manager
Water Quality Field Services Unit
